Dear Sir,
Please don't dredge sand from your proposed site near the Horseshoe reef. I
am a scuba enthusiast and instructor have made some of my best dives at
this site. I could show you one video taped dive at this site where I saw
more species of fish, some uncommon, for example Guitar fish, Frog fish and
Flying Gurnards, in just one dive than I had on 50 previous dives. I love
the beach, have 5 children and a wife who loves the beach, but we also love
the undersea environment. We shouldn't ruin the reefs for the sake of
spending an extra few dollars. Please reconsider your plans before
destroying one of the world's best dive sites.

Sincerely,

Stewart Davies
P.A.D.I. Master Scuba Instructor 48638
